EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Dr. Morris on 6/27/06.

The application has been amended as follows: claims 21-23 have been canceled and added to claim 17.

CLAIM 17 has been amended as follows:

Claim 17. A reflective display device comprising:

a light incident side and an opposite side, the display device comprising a diffusing liquid crystalline material,

a first substrate on the light incident side and a second substrate on the opposite side enclosing the liquid crystalline material,

reflecting means between said first and second substrates which reflect light which is incident at an angle larger than a given angle of incidence and pass light which is incident at an angle smaller than said given angle of incidence, and

said display device further comprising an absorbing element which absorbs light passed by said reflecting means[.];

wherein said reflecting means comprises a first layer disposed on a second layer, wherein an interface between said first layer and said second layer is non planar, said first layer and said second layer having different indices of refraction;

wherein said second layer is disposed on a third layer, said third layer has a different index of reflection than said second layer; and

wherein said second layer has a higher index of refraction than said first and said third layers.

The following is an examiner's statement of reasons for allowance: PCT/IB97/01299 (299) teaches all the limitations except the interface between said first layer and said second layer

Art Unit: 2871

of the reflector being non planar. Although, it does teach a diffuse layer 17, 299 does not teach or suggest the non-planar interface. The NPL article by Cornelissen et al. teaches all the limitation except the interface between said first layer and said second layer of the reflector being non planar. The 344 US Patent does not use three layers for form the reflector. Accordingly, the prior art of record fails to teach or suggest the interface between said first layer and said second layer of the reflector being non planar.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James A. Dudek whose telephone number is 571-272-2290. The examiner can normally be reached on 9:00-5:30. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
